

Excel for Data Analytics – Day 1 & Day 2 Assessment

Total Questions: 40

Difficulty: Beginner → Intermediate → Interview Level

Dataset Used: Retail Sales Dataset (1001 Records)

Section A: Theoretical Interview Questions (15 Questions)

Q1.

What is the difference between a Workbook and a Worksheet?

Hint: Think about Excel file vs Excel sheet.

Q2.

Explain the difference between a Formula and a Function.

Hint: One is user-created, the other is predefined.

Q3.

What is the difference between Relative and Absolute Cell References?

Hint: Copy a formula down multiple rows.

Q4.

Why should merged cells be avoided in datasets?

Hint: Consider sorting, filtering and Pivot Tables.

Q5.

Why do businesses prefer Excel Tables instead of normal ranges?

Hint: Think about filters, dynamic ranges and formatting.

Q6.

Explain the difference between Currency and Accounting format.

Hint: Observe symbol alignment.

Q7.

What is the purpose of Freeze Panes?

Hint: Imagine working with 100,000 rows.

Q8.

What is Flash Fill?

Give one business example.

Hint: Think about extracting first names.

Q9.

Difference between COUNT and COUNTA.

Hint: What happens if text exists?

Q10.

Difference between SUMIF and SUMIFS.

Hint: Number of conditions.

Q11.

Difference between IF and IFS.

Hint: Number of decisions.

Q12.

Difference between AND and OR functions.

Hint: TRUE conditions.

Q13.

Explain the purpose of Logical Functions.

Hint: Decision making.

Q14.

What is a Logical Test in an IF Function?

Hint: TRUE or FALSE.

Q15.

What happens if no condition is TRUE in an IFS function?

Hint: Think about adding TRUE at the end.

Section B: Basic Practical Questions (10 Questions)

Q16.

Find the Total Quantity Sold.

Hint

Use the Quantity column.

Q17.

Find the Average Product Price.

Hint

Use the Price column.

Q18.

Find the Highest Product Price.

Hint

Use MAX.

Q19.

Find the Lowest Product Price.

Hint

Use MIN.

Q20.

Count Total Orders.

Hint

Each Quantity is numeric.

Q21.

Find Total Quantity Sold in Delhi.

Hint

SUMIF

Q22.

Count Laptop Orders.

Hint

COUNTIF

Q23.

Find Average Price of Printers.

Hint

AVERAGEIF

Q24.

Find Highest Laptop Price.

Hint

MAXIFS

Q25.

Find Lowest Router Price.

Hint

MINIFS

Section C: Business Scenario Questions (10 Questions)

Q26.

Calculate Total Sales done by Rahul Singh.

Hint

Create Total Amount column first.

Use SUMIF.

Q27.

Find Total Quantity Sold in Mumbai for Laptop.

Hint

SUMIFS

Q28.

Count Laptop Orders from Bengaluru.

Hint

COUNTIFS

Q29.

Find Average Tablet Price in Pune.

Hint

AVERAGEIFS

Q30.

Find Highest Monitor Price in Nagpur.

Hint

MAXIFS

Q31.

Find Lowest Office Chair Price in Delhi.

Hint

MINIFS

Q32.

Count Orders handled by Vikas Kumar from Bengaluru.

Hint

COUNTIFS with two conditions.

Q33.

Find Total Quantity sold by Priya Gupta.

Hint

SUMIF

Q34.

Find Average Price of Smartphones.

Hint

AVERAGEIF

Q35.

Calculate Total Revenue generated by Mouse sales.

Hint

Create Total Amount column first.
Use SUMIF.

Section D: Logical Function Questions (5 Questions)

Q36.

Create a column named **Order Type**

If Quantity ≥ 5

Return

Bulk Order

Else

Normal Order

Hint

IF Function

Q37.

Create a Product Rating column.

Quantity

8 or more $\rightarrow$ High

5-7 $\rightarrow$ Medium

2-4 $\rightarrow$ Low

Below 2 $\rightarrow$ Very Low

Hint

IFS Function

Q38.

Create a Premium Order column.

Condition

Quantity ≥ 8

AND

Price $\geq 20,000$

Premium

Else

Regular

Hint

IF + AND

Q39.

Create a Festival Offer column.

If Product is

Laptop

OR

Smartphone

Offer Eligible

Else

Not Eligible

Hint

IF + OR

Q40.

Create a Sales Category column.

Revenue (Total Amount)

Above ₹2,00,000 → Platinum

₹1,00,000–₹2,00,000 → Gold

₹50,000–₹99,999 → Silver

Below ₹50,000 → Bronze

Hint

IFS Function

Bonus Interview Challenge (Optional)

1. Explain why **SUMIFS** is generally preferred over multiple nested IF statements for conditional aggregation.
2. When would you choose **IFS** instead of **Nested IF**?
3. Write one real-world business scenario where **AND** is required instead of **OR**.
4. If you had a dataset with **5 lakh rows**, what Excel features would you use to analyze it efficiently?
5. Your manager asks for the **total sales of Laptops sold by Rahul Singh in Delhi**. Which function(s) would you use and why?

Assessment Coverage

Topic	Questions
Excel Basics & Theory	15
Aggregate Functions	5
Conditional Aggregate Functions	10
Logical Functions	5
Business Scenarios	5
Total	40 Questions

These questions are structured in the style commonly used during **Data Analyst interviews**, progressing from conceptual understanding to practical problem-solving with realistic business scenarios.
